DETAILED ACTION

Response to Amendment

1. The amendment filed May 16th, 2007 overcomes the following objection/rejection of the last Office Action:

- a. Objection to the claims 1-16.
- b. Rejection to the claims 1-16 for 35 U.S.C. 112, second paragraph.

Allowable Subject Matter

1. Claims 1-16 are allowable.

The following is an examiner's statement of reasons for allowance:

Regarding independent claim 1, Dartois (2003/0156658) discloses a peak limiting techniques can achieve power amplifier and the amplifier system in order to determine the distortion that the system produces. However, Ring (US 6750710) disclose a wireless peak reduction pre-distortion circuit (fig.2 and 3) for use with multi-carrier power amplifiers in a wireless communication system to improve the linearity and performance of the amplifier, in wireless cellular, PCS, wireless LAN, line of Sight microwave, military, or satellite communication systems, or satellite communication systems (col.2, line 50- col.3, line 57). But Dartois, Ring and the cited prior art fail to teach or fairly suggest the wireless peak suppression, phase and amplitude equalizer circuit comprising multi- carrier receiver, digital signal processing block, a multi-carrier transmitter block, and their functions as recited in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
